PROFESSIONAL EXPERIENCE

EdPlus, Arizona State University **06/2026 - Present**
AI Software Engineer *Phoenix, AZ*

- Own a multi-agent LLM platform end to end on AWS Bedrock and Step Functions: 12 tool-calling agents over 76 tools answer questions on any structured dataset, each answer cited to its source rows.
- Built the LLM eval harness: code-scored benchmarks and LLM-as-judge rubrics gate every agent and prompt change; answer verification cut hallucinated figures 85% across 164 published results.
- Built traceability into every LLM run: per-row correlation IDs, versioned outputs and corrections, lineage and replayable runs; structured outputs reached 100% join integrity where 1 in 8 rows used to be mislabeled.
- Cut pipeline latency from 500 to 85 seconds with direct tool calls and held a 19-call run to $0.03 with Bedrock prompt caching, bounding failures and spend with a 5% circuit breaker and per-stage caps.

MyStage Music Inc. **03/2025 - 06/2026**
Founding AI/ML Engineer *Remote*

- Rebuilt a 14-Cloud-Function backend as one durable LangGraph agent workflow on GCP Cloud Run, with checkpointing and human-in-the-loop interrupt and resume, cutting service dependencies 64%.
- Instrumented LLM observability via Logfire (OpenTelemetry), tracing each run across pause and resume.
- Lifted dataset accuracy 25% with Gemini entity resolution, scored by LLM-as-judge, over 70,000+ records a day.

EdPlus, Arizona State University **09/2023 - 05/2025**
Software Engineer *Phoenix, AZ*

- Shipped a multi-tenant RAG assistant to 1,000+ faculty building courses for 60,000+ students, with hybrid vector and keyword search, section-aware chunking and a source citation on every answer.
- Gated every prompt release on Prompt Flow LLM-as-judge evals for groundedness, relevance and coherence.

Arizona State University **08/2024 - 05/2025**
Student Researcher *Phoenix, AZ*

- Built a PyTorch and Diffusers benchmark for text-to-video models that scores physical plausibility separately from visual quality, holding seed, resolution and sampler fixed.

Knowledge Exchange for Resilience, Arizona State University **06/2024 - 08/2024**
Data Research Aide *Phoenix, AZ*

- Reduced p95 retrieval latency 60% at 95% recall using hybrid FAISS and Neo4j search.

Zeus Learning **01/2022 - 07/2023**
Software Engineer *Mumbai, India*

- Reduced deployment time 70% and production incidents 40% through containerized CI/CD and SonarQube quality gates.

PROJECTS

SRP Electric MCP Server | GitHub **12/2025 - 01/2026**

- Built a Python/FastMCP integration exposing seven utility-account tools for billing, usage and outage queries, with an interactive setup wizard.

TECHNICAL SKILLS

Languages & APIs: Python, TypeScript, SQL, FastAPI, NestJS
AI Engineering: Multi-agent systems, tool calling, RAG, GraphRAG, hybrid search, LLM evals, LLM-as-judge, structured outputs, guardrails, prompt caching
Frameworks & Data: AWS Bedrock, LangGraph, MCP, PostgreSQL, pgvector, Neo4j, DuckDB
Cloud & Observability: AWS Step Functions, GCP Cloud Run, Logfire, OpenTelemetry, Docker, pytest

EDUCATION

Arizona State University (ASU) **08/2023 - 05/2025**
M.S., Computer Science | GPA: 4.0 *Tempe, AZ*

Dhirubhai Ambani Institute of Information and Communication Technology **08/2018 - 05/2022**
B.Tech., Information and Communication Technology *Gandhinagar, India*
