PROFESSIONAL EXPERIENCE

EdPlus, Arizona State University **06/2026 - Present**
AI Software Engineer *Phoenix, AZ*

- Own a full-stack TypeScript platform end to end: a 14-page Nuxt 4 frontend over a 10-module NestJS API sharing one typed contract, with 4,845 tests across 347k lines in 12 workspace packages.
- Shipped an AI chart builder: readers ask in plain English, get a Vega-Lite chart, then edit it with sort, stack, top-N, filters and undo/redo; every chart also ships an accessible data table and alt text.
- Built EdSpace in two days for the EdPlus hackathon: a live office map with room booking, desk claiming, walking routes and 3D desks, shown to leadership up to the CEO and going live for 500+ people.
- Accelerated publishing of a 51,280-respondent survey from 19 minutes to 109 seconds; an independent raw-data audit matched all evaluated figures.
