PROFESSIONAL EXPERIENCE

EdPlus, Arizona State University **06/2026 - Present**
AI Software Engineer *Phoenix, AZ*

- Validated 25 statistical tests and six causal estimators against SciPy and statsmodels; scored 68% on a 100-question StatQA sample, against GPT-4o's best reported 64.83%.
- Designed a controlled experiment showing model choice moves text-classification F1 33x more than pipeline design (0.230 vs 0.007), redirecting the team's roadmap toward reliability.
- Quadrupled the headline findings automated reports recover, 13% to 52–59% on held-out datasets, by letting an LLM choose analyses while code computes every number.
- Designed conformal accept and abstain thresholds that bound the error rate on accepted labels, giving every label a calibrated 0–100 confidence.

MyStage Music Inc. **03/2025 - 06/2026**
Founding AI/ML Engineer *Remote*

- Lifted dataset accuracy 25% with Gemini entity resolution, scored by LLM-as-judge, over 70,000+ records a day.

EdPlus, Arizona State University **09/2023 - 05/2025**
Software Engineer *Phoenix, AZ*

- Gated every prompt release on Prompt Flow LLM-as-judge evals for groundedness, relevance and coherence.
- Compared fixed-size and section-aware chunking on course documents to preserve complete policy passages in retrieved results.

Arizona State University **08/2024 - 05/2025**
Student Researcher *Phoenix, AZ*

- Built a PyTorch and Diffusers benchmark for text-to-video models that scores physical plausibility separately from visual quality, holding seed, resolution and sampler fixed.
- Found visual quality barely predicts physical plausibility: the top model by human preference ranked last on causal consistency.

Knowledge Exchange for Resilience, Arizona State University **06/2024 - 08/2024**
Data Research Aide *Phoenix, AZ*

- Built a FastAPI and pgvector collaborator recommender achieving 85% top-k precision in evaluation.
- Lifted search relevance 15% over baseline with an n-gram ranking model over cleaned researcher-profile text.

Zeus Learning **01/2022 - 07/2023**
Software Engineer *Mumbai, India*

- Built a desk-demand prediction model on historical occupancy by floor, day and team, served from Redis to 300+ offices; reported occupancy improved 30%.

PROJECTS

AiJockey – AI DJ Pipeline | GitHub **2025 - Present**

- Built a PyTorch/FastAPI audio pipeline with stem separation, LLM transition planning and 25+ DSP transitions; ported inference to AMD MI300X.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, pandas, NumPy, SciPy, statsmodels, DuckDB, PyTorch
Statistics & ML: Hypothesis testing, causal inference, experiment design, conformal prediction, calibration, text classification, recommendation
Evaluation & Visualization: Benchmark design, F1, precision@k, inter-rater agreement, LLM evals, Vega-Lite

EDUCATION

Arizona State University (ASU) **08/2023 - 05/2025**
M.S., Computer Science | GPA: 4.0 *Tempe, AZ*

Dhirubhai Ambani Institute of Information and Communication Technology **08/2018 - 05/2022**
B.Tech., Information and Communication Technology *Gandhinagar, India*
