# ARCHIT AGRAWAL

San Francisco Bay Area | 623-312-0435 | architagrawal000@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL EXPERIENCE

**EdPlus, Arizona State University** **06/2026 - Present**
*AI Software Engineer* *Phoenix, AZ*

- Designed a serverless data lake on S3: a narrow fact table plus Lance payloads queried in-process by DuckDB, so new datasets union without a migration.
- Built schema-inferring ingestion for any table shape, from crosstabs to weighted surveys and UTF-16 files, emitting each decision as a JSON recipe that replays exactly.
- Traced silent row loss in Step Functions runs that reported success and fixed it with partitioned writes and fan-in across 64 parallel lanes.
- Tracked data lineage with four typed relations (relabel, recode, wave, wave_recoded), so a second labeling pass can never pose as a trend.

**MyStage Music Inc.** **03/2025 - 06/2026**
*Founding AI/ML Engineer* *Remote*

- Scaled ingestion to 70,000+ records daily from 650+ venues using Playwright, transactional locking and entity resolution.
- Made ingestion retries safe with deterministic task IDs and atomic create-if-absent writes, preventing duplicate jobs from overwriting in-flight work.

**EdPlus, Arizona State University** **09/2023 - 05/2025**
*Software Engineer* *Phoenix, AZ*

- Reduced transcript-analysis time from four hours to 15 minutes using a Neo4j knowledge graph and validated Cypher queries.

**Knowledge Exchange for Resilience, Arizona State University** **06/2024 - 08/2024**
*Data Research Aide* *Phoenix, AZ*

- Built an idempotent ETL pipeline for 10,000+ researcher profiles daily, using PostgreSQL natural-key upserts to prevent duplicates after partial failures.
- Put data-quality gates in PostgreSQL, with uniqueness, not-null and range constraints, so bad rows fail at ingestion; dataset accuracy rose to 95%.

**Zeus Learning** **01/2022 - 07/2023**
*Software Engineer* *Mumbai, India*

- Migrated a C#/.NET monolith to Dockerized Kubernetes microservices, reducing infrastructure cost 20% and resource footprint 35%.

## PROJECTS

**Clash Royale Analytics** **2025**

- Built a scheduled ETL pipeline that dedupes battle data, loads incrementally and runs backfills without blocking the live cron, with Vitest coverage per stage.

## TECHNICAL SKILLS

**Languages & Storage:** Python, SQL, TypeScript, S3, PostgreSQL, MySQL, DuckDB, DynamoDB, Firestore, Redis, SQLite
**Pipelines & Orchestration:** ETL, incremental loads, backfills, AWS Step Functions, Lambda, SQS, Cloud Run Jobs, Cloud Scheduler, Cloudflare Workers
**Data Modeling & Quality:** Data modeling, fact tables, data warehousing, data validation, data lineage, schema inference, deduplication, entity resolution
**DevOps:** Docker, Kubernetes, GitHub Actions, CI/CD, pytest, Vitest

## EDUCATION

**Arizona State University (ASU)** **08/2023 - 05/2025**
*M.S., Computer Science | GPA: 4.0* *Tempe, AZ*

**Dhirubhai Ambani Institute of Information and Communication Technology** **08/2018 - 05/2022**
*B.Tech., Information and Communication Technology* *Gandhinagar, India*
